

Goals and Deadlines

Week 0

The following are immediate goals which we will try to finish by this week: *

- Get the bitbucket repository and fully understand the code there.
- * Get the data required from Binance and Parameters from Thalib.

Week 1

This will be the post-analysis phase, which should be done by next week: *

- Decide on the rules that will serve as indicators to buy/sell and implement them.
- * Prepare the Telegram messaging port.
- * Decide and implement a metric to compare different algorithms and indicators.
